Environmental Product Declaration

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

MOVO S

from

Pedrobeat AS

Programme:	The International EPD System, www.environdec.com
Programme operator:	EPD International AB
Type of EPD:	EPD of multiple products, based on a representative product
EPD registration number:	EPD-IES-0027161:002
Version date:	2025-11-26
Validity date:	2030-11-25
	An EPD may be updated or depublished if conditions change. To find the latest version of the EPD and to confirm its validity, see www.environdec.com

GENERAL INFORMATION

Programme Information	
Programme:	The International EPD® System
Address:	EPD International AB Box 210 60 SE-100 31 Stockholm Sweden
Website:	www.environdec.com
E-mail:	support@environdec.com

Product Category Rules (PCR)
CEN standard EN 15804 serves as the Core Product Category Rules (PCR)
Product Category Rules (PCR): PCR 2019:14 Construction products (version 2.0.1)
PCR review was conducted by: The Technical Committee of the International EPD® System. Chair of the PCR review is Rob Rouwette. The review panel may be contacted via info@environdec.com.

Third-party Verification
Independent third-party verification of the declaration and data, according to ISO 14025:2006, via: ☒ EPD verification by individual verifier Third-party verifier: prof. Ing. Silvia Vilčeková, Ph.D., Silcert, s.r.o. Approved by: The International EPD® System
Procedure for follow-up of data during EPD validity involves third party verifier: ☐ Yes ☒ No

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but published in different EPD programmes, may not be comparable. For two EPDs to be comparable, they shall be based on the same PCR (including the same first-digit version number) or be based on fully aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have identical scope in terms of included life-cycle stages (unless the excluded life-cycle stage is demonstrated to be insignificant); apply identical impact assessment methods (including the same version of characterisation factors); and be valid at the time of comparison.
For further information about comparability, see EN 15804 and ISO 14025.

INFORMATION ABOUT EPD OWNER

Owner of the EPD: Pedrobeat AS
Address: Harku 27, 11612 Tallinn Estonia
Contact: Ave Keenan, ave.keenan@lightholm.com
Address and contact information of the LCA practitioner commissioned by the EPD owner
LCA Studio s.r.o.
Ing. Petra Bánhegyi (petra.banhegyi@lcastudio.cz); Ing. et Ing. Tatiana Trecáková, Ph.D. (tatiana.trecakova@lcastudio.cz)
Šárecká 1962/5, 16000 Prague 6, Czech Republic www.lcastudio.cz

LCA Studio

Description of the organisation:

Since 2014, Lightholm has been a trusted leader in innovative industrial lighting solutions, delivering expertise across diverse needs—from streets and sports facilities to complex environments like harbors and oil rigs. Designed in Sweden and crafted in the EU, its products embody Nordic innovation and European precision.

Lightholm stands out for its client-focused approach, anticipating needs, tailoring solutions, and providing agile, bespoke service with unmatched care. The company is committed to sustainability, creating energy-efficient lighting that reduces light pollution and carbon footprints while ensuring long-lasting performance.

Lightholm formerly known as PBLC, the lighting division of Pedrobeat AS, Lightholm continues to simplify complex lighting solutions with efficiency and expertise.

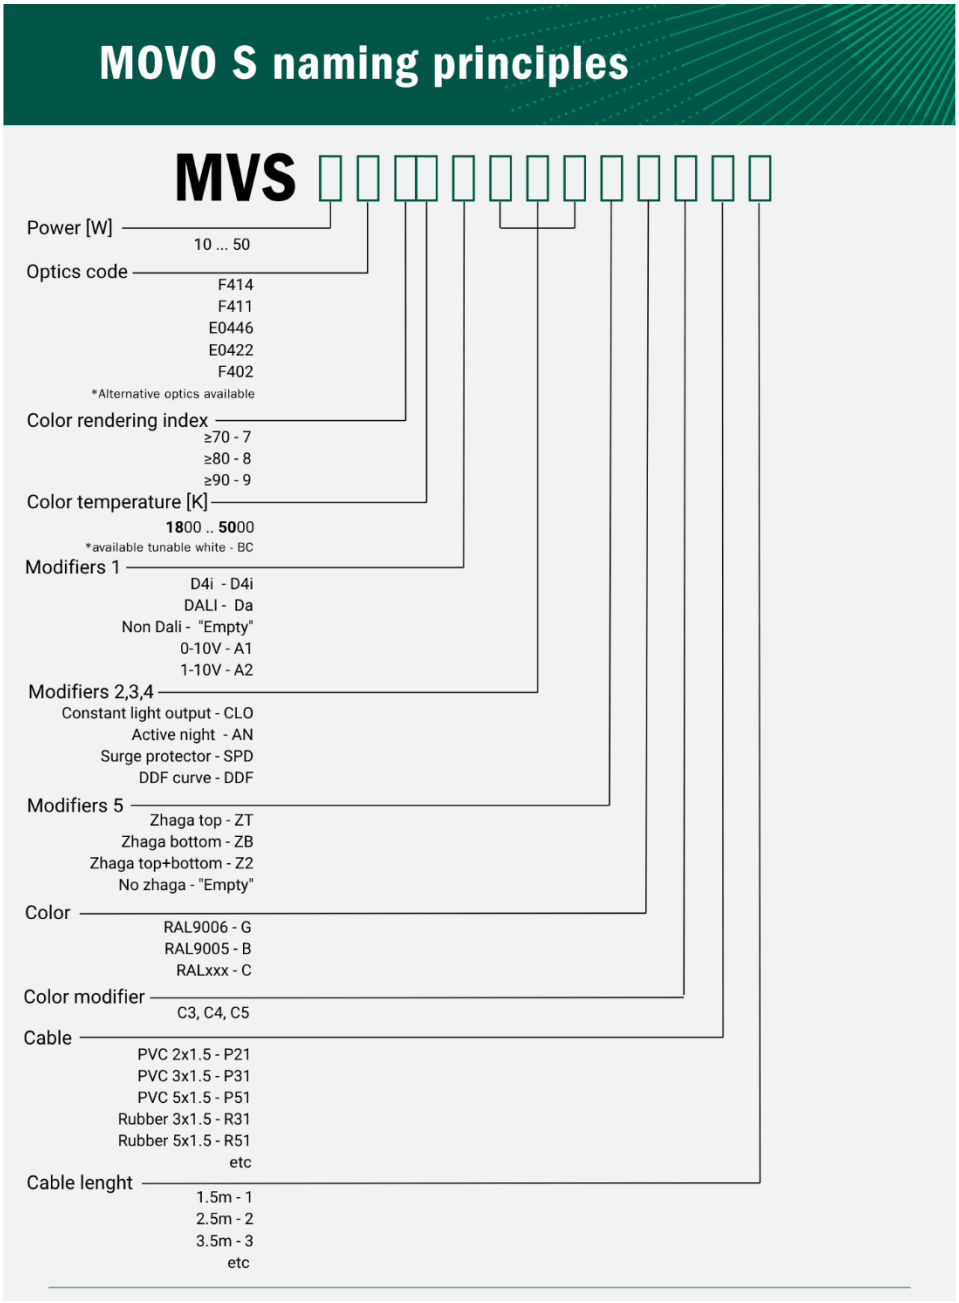
Product-related or management system-related certifications: Manufacturing unit is certified for ISO 9001 and ISO 14001. LED luminaires are manufactured to fulfil the requirements of IEC 60598-1, IEC 60598-2-3.

PRODUCT INFORMATION

Product name: MOVO S

Included products: The MOVO S product family covers power levels from 10 W to 50 W and offers a wide variety of optics designed for different lighting applications. The products are available with multiple colour temperature (CCT) and colour rendering index (CRI) options. Additional customization includes various dimming options, and socket types (Zhaga Top, Zhaga Bottom, or Zhaga Top + Bottom). These variations are described in detail in the illustration “MOVO S naming principles.”

Product identification:



UN CPC code: 4653 Lighting equipment

Product description: MOVO S streetlight series is a highly practical luminary range with lens technology for smaller road and area lighting applications, ranging from pedestrian roads and urban streets to parking lots with maximum demands in terms of quality of light, functionality, design and individual needs. MOVO S integrates the latest available technology of light source, gear and controls as an answer to the demand for energy savings and efficiency.

For MOVO S, technical parameters are as follows:

Product	Road and street luminaire with LED module
Rated voltage	220 – 240 Vac
Rated frequency	50/60 Hz
Rated power	10 - 50 W
Ambient temperature range	ta: -40...45°C
Classification	Class I, Class II
Degree of protection	IP66, IK09

MVS 30 F411 740 CLO G C3 P31.8 - is declared as a representative product, based on production volumes.

Name and location of production site(s): „Ezīši“, Mārupes novads, LV-2166

CONTENT DECLARATION

Product content	Mass, kg	Post-consumer recycled material, mass-% of product	Biogenic material, mass-% of product	Biogenic material, kg C/product or declared unit
Aluminum	2,6880	0	0	0
Glass	0,9520	0	0	0
Silicon	0,0380	0	0	0
Galvanized steel	0,1906	0	0	0
Aluminium oxide	0,0070	0	0	0
Stainless steel	0,0630	0	0	0
Polycarbonate	0,0019	0	0	0
PCB	0,0600	0	0	0
LED Driver	0,2000	0	0	0
Polymethyl methacrylate	0,0320	0	0	0
Cable	0,7500	0	0	0
Polyamide	0,0100	0	0	0

TOTAL	4,9925	0	0	0

Packaging materials	Mass, kg	Mass-% (versus the product)	Biogenic material, kg C/product or declared unit
Paper packaging (kg)	0,010	0,20	0,0046
Plastics packaging (kg)	0,007	0,14	0
Wood pallets (kg)	0,430	8,61	0,1892
TOTAL	0,447	8,95	0,1938

1 kg biogenic carbon in the product/packaging is equivalent to the uptake of 44/12 kg of CO_2.

Hazardous substances from the candidate list of SVHC	EC No.	CAS No.	Mass-% per product or declared unit
No substances included in the Candidate List of Substances of Very High Concern for authorization under the REACH regulations are present in this product either above the threshold for registration with the European Chemicals Agency or above 0,1% weight.			

LCA INFORMATION

Declared unit: 1 piece of the luminaire, equals to 4,99 kg.

Conversion factor: The conversion factor to mass of 1 kg is 0,200. To convert the results per 1 kg, the values must be multiplied by this factor.

Reference service life: 100 000 h

Time representativeness: Site specific data from producer is based on 1 year average for process data (reference year 2024). Time scope less than 10-years was applied for background data. Time scope less than 2 years was applied for specific data.

Geographical scope: Global, Europe, Latvia

Database(s) and LCA software used: Software LCA for Experts (version 10.9.1.19). Sphera databases (content version 2025.2), ecoinvent database (version 3.11.), EPD of LED driver.

Description of system boundaries:
The system boundary is cradle to grave and module D (A+B+C+D) according to EN 15804 + A2/AC:2021. It covers the production of raw materials, all relevant transport down to the factory gate, manufacturing of luminaire MOVO S by Pedrobeat AS, transport from the Pedrobeat AS plant to the site (582 km truck, 465 km ship), installation of luminaire including product unpacking, operational energy of use of luminaire (considered European residual electricity grid mix), deconstruction of the luminaire, transport of deconstructed materials, waste processing and recycling of used luminaire.

System diagram:

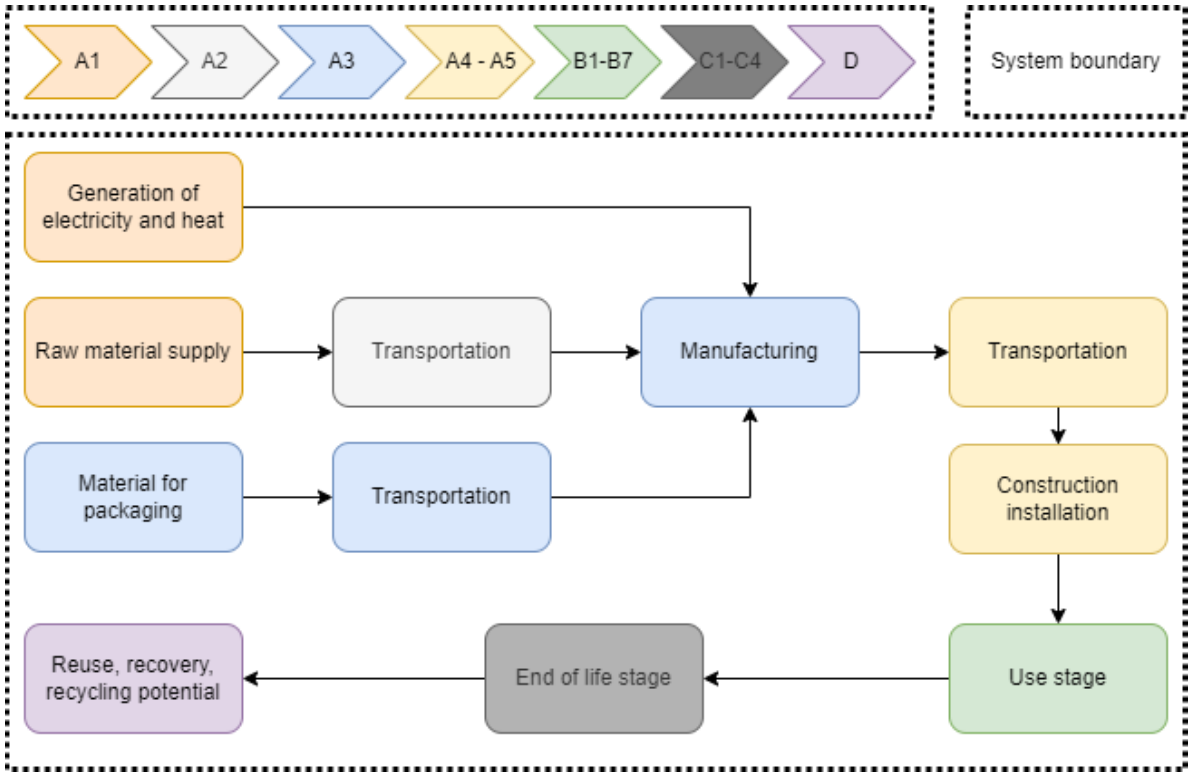

Figure 1 System boundary of the LCA study conducted on production of MOVO S

More information:
Cut off rules: The cut-off criterion was chosen based on the used PCR. According to the used PCR, more than 99% of flows were included.

Allocations: As a general allocation rule the production of 1 piece of product was chosen. Common inputs (electricity, thermal energy, water), material inputs, transport and common outputs (waste generated) are allocated to this product, i.e. to declared unit of this product.

General content of scrap steel and iron in steel, in steel galvanised production; 97% of aluminium scrap in aluminium ingot production and general content of stainless steel scrap in stainless steel production are used in production of a luminaire. No secondary fuels are used in production.

Information about declared modules:
Module A1 covers the production of materials and components for Pedrobeat AS and includes fuels and energy carriers (electricity, natural gas). This consists of the production of input materials.
Module A2 covers the transport of material into the site of production Pedrobeat AS Generic DB processes with site-specific parameters for distance were used.
Module A3 covers on-site operated processes dealing with MOVO S production and packaging. These processes are under the operational control of Pedrobeat AS and these are specific processes modelled based on data collection.
Module A4 covers the transport of product from the site of production Pedrobeat AS to the site of installation (considered weighted average 582 km by truck and 465 km by ship). Generic DB processes with site-specific parameters for distance were used. According to PCR a weighted average of transportation modes and distances, based on transportation to several customers or markets, representing the geographical scope of the EPD was used in module A4.

Module A5 covers the phase of treatment and disposal of waste generated from the unpacking and installation of MOVO S. Default processes according to the PCR were used for recycling of packaging materials. It is assumed material recycling of wood and energy recovery of plastics and paper.
Module B6 covers operational energy use during the use phase of luminaires (considered European residual electricity grid mix).

It is assumed, that product is to 100% sent to recycling. According to the PCR, the share of the product that is recycled is lower than 100%. In this scenario, losses occur in the recycling process; therefore, 5% of the metals are assumed to be landfilled.
Module C1 covers estimated energy for deconstruction related to the mass of deconstructed material. According to PCR 1,1 kWh/t of energy carrier Diesel was used for deconstruction of luminaire.
Module C2 covers the transport of material into recycling facility. Generic DB processes with estimated general distances were used according to PCR. Distance for the transport of material for recycling was set according to PCR at 80 km.
Module C3 covers the processing for loading and unloading at sorting facility, sorting, treatment of materials before recycling and recycling of aluminium, steel, stainless steel and copper of used luminaire according to PCR.
Module C4 covers the process for disposal/landfilling for steel, stainless steel, copper and aluminium.
Module D covers declared benefits from energy recovery of materials from waste-to-energy plant. In this case it is energy recovery of used packaging of product.

Electricity mix: DB process of Latvian residual grid mix is used for consumed electricity in production process in Pedrobeat AS The used dataset has impact of 0,61 kg CO_2 eq./kWh for GWP-GHG indicator.

Characterisation factors: Characterisation factors are based on Environmental Footprint 3.1. (EF 3.1).

Data quality of processes contributing with more than 10% to the GWP-GHG results of modules A1-A3:

Process	Source Type	Source	Reference year	Data category
Production of LED driver	EPD	Supplier EPD	<5 years old	Primary
Production of PCB	Database	Ecoinvent 3.11	2024	Secondary
Production of aluminium	Database	Sphera 2025.2	2024	Secondary

The data quality assessment has been carried out in accordance with EN 15941 and the applicable PCR requirements. The assessment covers geographical, technical, and temporal representativeness of the data and includes all relevant datasets contributing to at least 80% of the results for each declared environmental impact indicator. Primary data from the production process (including raw materials, auxiliary materials, and energy consumption) have been complemented with high-quality secondary data from recognized databases (Sphera 2025.2 and Ecoinvent 3.11). Based on this evaluation, the overall data quality is considered good and compliant with EN 15941.

Modules declared, geographical scope, share of specific data (in GWP-GHG results) and data variation (in GWP-GHG results):

	Product stage			Construction process stage		Use stage							End of life stage				Resource recovery stage
	Raw material supply	Transport	Manufacturing	Transport	Construction installation	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use	De-construction demolition	Transport	Waste processing	Disposal	Reuse-Recovery-Recycling-potential
Module	**A1**	**A2**	**A3**	**A4**	**A5**	**B1**	**B2**	**B3**	**B4**	**B5**	**B6**	**B7**	**C1**	**C2**	**C3**	**C4**	**D**
Modules declared	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X
Geography	GLO	GLO	LV	EU	EU	EU	EU	EU	EU	EU	EU	EU	EU	EU	EU	EU	EU
Specific data used	10,3%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation – products	-8,7%;+45,7%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation – sites	0%			-	-	-	-	-	-	-	-	-	-	-	-	-	-

The share of primary data is calculated based on GWP-GHG results. It is a simplified indicator for data quality that supports the use of more primary data, to increase the representativeness of and comparability between EPDs. Note that the indicator does not capture all relevant aspects of data quality and is not comparable across product categories.

The variations above 10% are declared for relevant impact categories as below:

LCA result of one declared unit product (A-C)	Min	Max	Explanation of the variation
EP-freshwater	-77,60%	+44,10%	Different weight of PCB, Zhaga and SPD components
ADP-mineral and metals	-25,64%	+49,01%	Different weight of PCB, cables, LED driver, Zhaga and SPD components
PENRM	-	+33,33%	Different weight of LED driver component
HWD	-87,23%	+36,37%	Different weight of PCB, Zhaga and SPD components
NHWD	-27,44%	+29,37%	Different weight of PCB, cables, LED driver, Zhaga and SPD components

ENVIRONMENTAL PERFORMANCE

EP	Eutrophication Potential
EP-freshwater	Freshwater eutrophication potential (kg P eq.)
EP-marine	Marine eutrophication potential (kg N eq.)
EP-terrestrial	Terrestrial eutrophication potential (mol N eq.)
POCP	Photochemical Ozone Creation Potential (kg NMVOC eq.)
ADP	Abiotic Depletion Potential
ADP-minerals&metals	Abiotic depletion potential for non-fossil resources (kg Sb eq.)
ADP-fossil	Abiotic depletion potential for fossil resources (MJ)
WDP	Water Deprivation Potential (m^3)
Resource Use Indicators	
PERE	Use of renewable primary energy excluding renewable primary energy resources used as raw materials (MJ)
PERM	Use of renewable primary energy resources used as raw materials (MJ)
PERT	Total use of renewable primary energy resources (MJ)
PENRE	Use of non-renewable primary energy excluding non-renewable primary energy resources used as raw materials (MJ)
PENRM	Use of non-renewable primary energy resources used as raw materials (MJ)
PENRT	Total use of non-renewable primary energy resources (MJ)
SM	Use of secondary material (kg)
RSF	Use of renewable secondary fuels (MJ)
NRSF	Use of non-renewable secondary fuels (MJ)
FW	Use of net fresh water (m^3)
Waste Indicators	
HW	Hazardous Waste (disposed) (kg)
NHW	Non-Hazardous Waste (disposed) (kg)
RW	Radioactive Waste (disposed) (kg)
Output Flow Indicators	
CFR	Components for Reuse (kg)
MR	Material for Recycling (kg)
MER	Materials for Energy Recovery (kg)
EEE	Exported Energy, Electricity (MJ)
EET	Exported Energy, Thermal (MJ)
Lifecycle Stages / Modules	
A1	Raw material supply
A2	Transport
A3	Manufacturing
A4	Transport to site
A5	Construction/Installation
B1	Use
B2	Maintenance
B3	Repair
B4	Replacement
B5	Refurbishment
B6	Operational energy use
B7	Operational water use
C1	Deconstruction/Demolition
C2	Transport to waste processing

C3	Waste processing
C4	Disposal
D	Reuse-Recovery-Recycling potential
Other Relevant Terms	
SVHC	Substances of Very High Concern
EC No.	European Community Number
CAS No.	Chemical Abstracts Service Number
MJ	Megajoule
kg	Kilogram
m^3	Cubic Meter
NMVOC	Non-Methane Volatile Organic Compounds
Sb eq.	Antimony Equivalents
P eq.	Phosphorus Equivalents
N eq.	Nitrogen Equivalents
CFC-11 eq.	Chlorofluorocarbon-11 Equivalents
CO_2 eq.	Carbon Dioxide Equivalents
kg C	Kilograms of Carbon
kg CO_2 eq.	Kilograms of Carbon Dioxide Equivalent
ND	Not Declared
